

KADİR HAS UNIVERSITY

2023-2024 STUDENT'S GUIDEBOOK

Dear Students,

I welcome all our new students joining us in the 2023-2024 Academic Year and wish you success in all your academic and social efforts.

Our main goal at Kadir Has University is to have graduates, who courageously address, and are capable of delivering solutions to all large and small problems that people have encountered and will encounter in a vast range of fields from Life and Engineering Sciences to Humanities and Social Sciences. For this purpose, we have developed the “Kadir Has University Education Model” which will offer universal values to you, ensure that you are a free individual, and equip you with all competencies you need to meet the necessities of the time. We are proud of offering you this education model that we have prepared with innovative analyses developed during this journey of becoming a global university which will be an example for both Turkey and the world.

With all the academic and administrative staff, we are excited to meet you and, all together, contribute to science, art and society. Welcome to Kadir Has University, which is a true center of science, research, culture, art and reason and I would like to tell you that together with all the administrative and academic staff, we are ready to support you in any aspect of your education.

I wish that every moment you have at Kadir Has University would be unforgettable for your academic, intellectual and personal development.

Best regards,

Prof. Dr. Sondan DURUKANOĞLU FEYİZ
PresidentRektör

KADİR HAS

Kadir Has is the founder of our university, the first Chairman of the Board of Trustees, one of the leading philanthropic businessmen raised by the Republic of Turkey, and the holder of the State Medal of Distinguished Service. In his own words, Mr. Has believed that it was his most tremendous honor to put what he earned from this country into the service of this country.

He worked all his life to pay his “patriotic debt” in line with this thought. Through the Kadir Has Foundation (HASVAK), founded with his wife Rezan Has in 1991, he carried out significant charitable work for the country’s development in many different fields, especially in education and health.

According to the couple’s will, he and his wife donated all their wealth to the foundation.

Mr. Kadir Has, who spoke of our university as his “biggest dream come true,” passed away in 2007. He left immortal works behind and continues to live in the philosophy of our university, and in the hearts of his beloved students, with his principles, worldview, patriotism, and love of education.

MyKHAS Portal

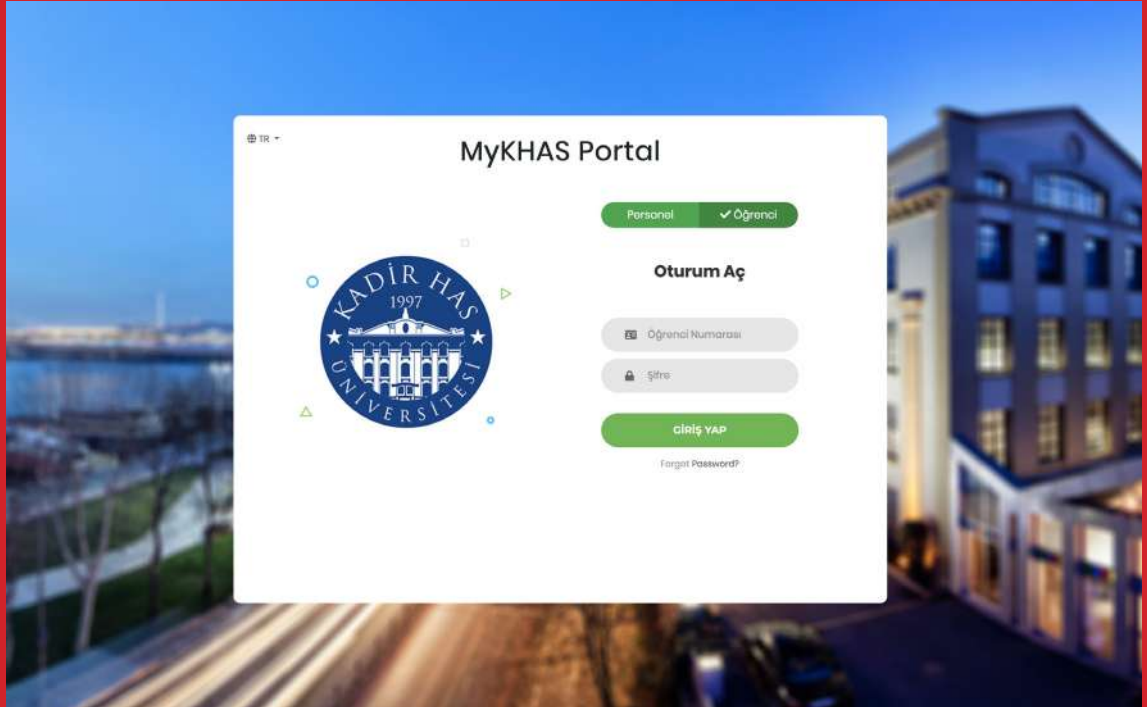

MyKHAS was put into service in 2019 to gather together all the concerned parties of our university on a single platform and, strengthen the communication between them.

MyKHAS offers many different services such as:

- Current announcements,
- News,
- Forms / Applications,
- Guidance,
- Syllabus,
- Booking for Psychological Counseling and Guidance Center, Music Room or Gym etc.

A mobile application will be soon put into practice for MyKHAS, which will offer all the similar contents and services.

You can access SPARKS and KHAS Learn portals via your e-mail address with the extension **“stu.khas.edu.tr”** defined to you during registration.

SPARKS (Student Portal: Academic Registration and Knowledge System)

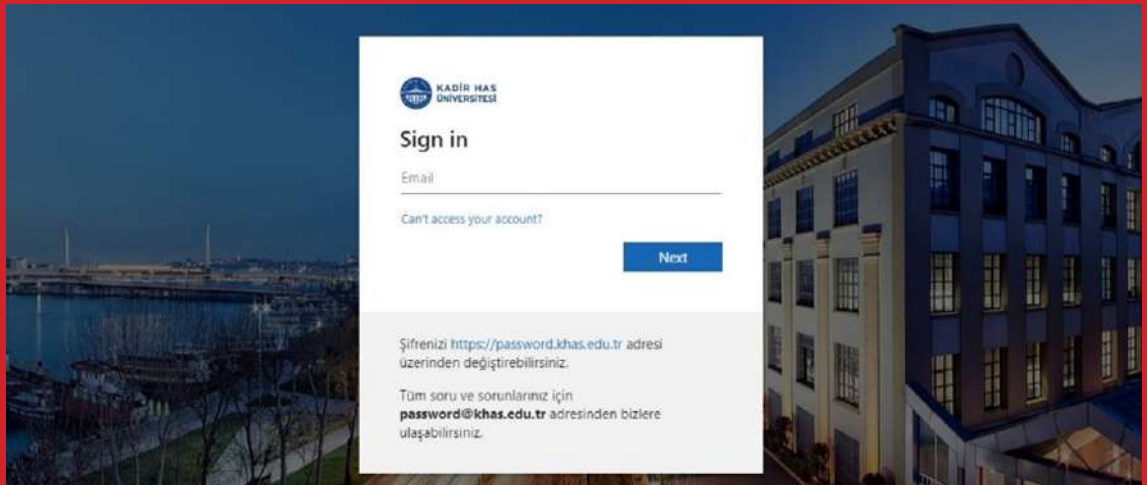

SPARKS is a program, where the student enrollment procedures and academic follow-ups are carried out online through the Internet, and all the student information is archived. You should attend the introduction organizations throughout the orientation days in order to get a better understanding of the full functions of the program.

All the announcements made at SPARKS, and all the messages forwarded to your e-mail addresses allocated by our university are considered notifications sent to your official addresses. As a student, you are required to check SPARKS announcements on a regular basis; Kadir Has University assumes no responsibility for any problem that may occur otherwise.

<http://sparks.khas.edu.tr>

You may make use of SPARKS with a password created for you during enrollment, which you could change on the system. Once you log on the system, you will be able to:

- 1) Select and enroll into the courses, and send them to your advisor,
- 2) View the approvals from your advisor,
- 3) Create a weekly course schedule,
- 4) View your grades and marks,
- 5) Make payments online,
- 6) Update your address and phone details,
- 7) Follow up announcements,
- 8) Request transcripts and student certificates,
- 9) View the courses to be opened every semester,
- 10) Monitor your graduation process through the Graduation Simulation.

In order to use SPARKS and KHAS Learn systems in an efficient manner, it is essential for the students to keep active their e-mail addresses with the extension **stu.khas.edu.tr** assigned during enrollment.

KHAS Lear

Learning Management System

KHAS Learn is a learning management system enabling that the course materials are presented on a digital environment, the students and faculty members communicate with one another in an easier manner, and the course activities are designed online.

Fully supports the distance education processes through the tools such as online exams, assignments, discussion panels and forums it contains.

Through KHAS Learn, you will have access to your courses from anywhere in the world making use of your unique username and password on any computer, tablet or smart phone with internet access and a web browser.

KHAS Learn at University

Launched at our university as of 2019, this system makes the courses interactive by means of enriching them through great contents, better communication among the students and faculty members and, extracurricular activities.

We have used KHAS Learn to manage all the distance education processes within the academic year of 2020-2021, and the distance education processes will remain active making use of KHAS Learn.

The Directorate of Information Technologies carries out the training and support services concerning the system.

You may also get further assistance from:

- the help tab on the web page of KHAS Learn, where you can send an e-mail to learn@khas.edu.tr,
- the Directorate of Information Technologies located at Cibali Campus, Block D, Kadir Has University.

Information Center (Library)

The Information Center supports the education and research programs of the students by means of meeting all kinds of requirements for information resources. Owing to the equal, unlimited and innovative information services it offers, it aims to provide the members with such competencies would give them a competitive advantage in their academic and professional lives. You can access all information about our services and facilities at <https://bilgimerkezi.khas.edu.tr/>.

Membership

Your account is created for the Information Center when you are enrolled. Please visit <https://katalog.khas.edu.tr/hesabim> to log on your account with the Information Center. Use the username and password for the e-mail address “@stu.khas.edu.tr” to log on.

Borrowing

You are free to “borrow” as many books, magazines and movies as you may need from the Information Center collections. The time extension regarding the borrowed resources is executed by Information Center.

Information Resource Request

Through your account with the Information Center, you may submit your requests and suggestions for such information resources (books, magazines, movies etc.) to be added to the collections of the Information Center in line with your needs for educational & research activities and intellectual development. These requests are evaluated within the Collection Improvement Policy, and those considered approvable are fulfilled through purchases or by means of making use of an interlibrary borrowing service. You can access printed and electronic resources from university libraries – 200 libraries in Turkey and, more than 7,000 libraries abroad – in line with your academic requirements through the “Interlibrary Borrowing” service.

Supporting Curriculumms

The “**Student Reserve Collection**” with the basic and supplementary resources of some courses is updated every academic semester upon the request of the faculty members. The printed course resources are located behind the Lending Desk and could be borrowed for such periods as designated by the faculty members (4 hours, overnight and daily). And you may access online course resources making use of the links made available below the respective course through KHAS Learn.

Printed and Electronic Collections

Our collections consist of **90 thousand** printed books, **8 thousand** DVDs, **1 million** e-books, and a total of **60,000** online/printed academic and popular journals and periodicals. You will also be able to access more than **1 billion** academic resources when you are inside or outside the campus at 24/7 through **100 online** databases that the Information Center is a subscriber for and has an access within the scope of a national license (EKUAL).

To access the online resources when you are not at the campus, please feel free to visit <http://icproxy.khas.edu.tr/login> and use your username and password for @stu.khas.edu.tr to log on.

Homework and Research Support

In order to efficiently benefit from the services and facilities offered by the Information Center, you can participate in “**Individual and Group Training Sessions**”, and you can request an appointment to get support from the Information Center team for your homework, researches and theses.

What is a course credit? What is a course selection and why is it important?

A course credit is the quantitative denomination of any study that a student is required to take from any course. The ECTS (European Credit Transfer System) credits are used at our university.

Education at the faculty is provided in accordance with the instructional plan decided by the relevant committees and approved by the University Senate by means of taking into account the common courses determined by the Higher Education Council and approved by the University Senate and, taking the opinions of the departments.

In order to graduate from a department of a faculty, the student must have completed 240 ECTS credits.

The courses in the instructional plan consist of both compulsory and elective courses. A compulsory course is the one that a student is required to take, while an elective course is the one that a student is required to take from a certain group of courses.

The course attendance requirements are determined by the respective faculty member, and applied as specified on the syllabus.

A student, who has taken and passed the compulsory courses as specified in the instruction plan of the respective department and, the elective courses as set forth by the said department, and who have increased their weighted grade point average to a minimum of 2.00, and completed all the studies (including internships) specified in the respective regulations, is considered to have completed their education and eligible to be awarded with a diploma.

Student Advisors

A faculty member is assigned as an advisor by the respective department to each student. The advisor guides the student throughout their education and, gives advice regarding the compulsory and elective courses that the student is required to take within the framework of Undergraduate, Double Major and Minor Programs.

A student should plan and organize your courses with their advisor and, have all the courses by their advisor during the enrollment with the courses in a semester.

During the semester course registrations, the students must arrange the courses with their advisors and have them approved by the advisors.

Academic Ethics

All the students and faculty members should pay attention to and comply with the principles of research ethics, publication ethics and academic ethics as set forth on the Regulations on Scientific Research and Publication Ethics at Kadir Has University during the performance of their academic studies.

Disciplinary proceedings are carried out against a student who is found to be in violation of the ethical rules such as cheats and plagiarism and, in case the student is found guilty as a result thereof, then the respective penalties are imposed as set forth under the Disciplinary Regulations in line with the Ethics Committee, up to the suspension from the university as the most severe sanction.

Supplementary Programs

1. Double Major Program (DMP)

A Double Major Program is intended to allow a student, who successfully pursues their major undergraduate program, to receive education in a second major at the same time so that they get a diploma of bachelor's degree in these two major programs.

You may apply for a double major program on the dates specified on the academic calendar earliest at the beginning of the third semester and latest at the beginning of the fifth semester.

As of the application date, the student must have a grade point of average of at least 2.72/4.00 on the major diploma program, and ranked on the top 20% in terms of success in the respective classroom of the major diploma program.

2. Minor Program (MP)

This is a program that allows a student, who successfully pursues one of the major undergraduate programs at Kadir Has University, to receive education in another field of interest. You may apply for a minor program on the dates specified on the academic calendar earliest at the beginning of the third semester and latest at the beginning of the sixth semester.

As of the application date, the student must have a grade point average of at least 2.50 / 4.00 and, fulfilled other requirements of the respective program, if any.

3. Internal Transfer (within Programs)

It is possible for a student to make an internal transfer within the university upon the decision of the management board of the respective unit based on the success among the equivalent programs or based on the central placement score within the scope of the Additional Clause 1 in accordance with the applicable legislations of the Higher Education Council.

International Relations

Erasmus and Exchange Office

Our university has 122 Erasmus+ student exchange agreements in over 20 European countries. In addition, within the Erasmus+ International Credit Mobility project scope, we have project-oriented agreements with 19 universities in 18 countries outside the EU.

Within the framework of exchange programs, we have agreements with 34 universities from 17 countries worldwide.

Within the scope of the European Internship Consortium, of which we are one of the founders, our students can participate in internships in Europe with grants.

As part of the 4+1 Program, Kadir Has University graduates receive special discounts and advantages in addition to merit scholarships at prestigious universities with which we have agreements for graduate degree applications.

Which units should I get to know to make my university life easier?

Directorate of Student Affairs

It is the responsibility of the Directorate of Student Affairs to carry out the new enrollments; enter the decisions made by the faculties concerning the students on the Academic Registration and Knowledge System (SPARKS); follow up the procedures concerning course enrollments, courses added-dropped and withdrawn on the dates as set forth under the Academic Calendar; to prepare documents such as student certificates and transcripts etc.; and print and distribute diplomas, certificates and diploma supplements.

Offers supports and assistance to all the faculties, departments and programs at the university concerning its assigned fields. Acts as a bridge between the students, their families and other units at the university.

Faculty Secretariats

Performing the administrative tasks of the faculty, a faculty secretariat is the first help desk, where you may submit your petitions (such as a health report). A faculty secretariat also helps you contact the faculty members that you may wish to see or reach.

How to Solve a Problem

In case you may encounter a problem throughout your academic life, you should first consult your advisor. If the consultation with your advisor and, then the department / program head fails to accomplish a result, you should consult with the respective Dean or whenever deemed necessary, submit a written application to the respective Dean's Office/ Directorate.

Concerning such problems that could not be solved at the Dean's Office, the Deputy Rector in charge of the Student Affairs should guide you. In addition, the Directorate of Student Affairs, the secretariat of the relevant Dean/ Directorate, Executive Assistant of the Rector's Office and the General Secretary would support you at every stage.

The final decision-making body regarding the students' demands and problems is the Executive Board of the University.

Healthcare Services

We provide the students of Kadir Has University with short-term and solution oriented psychological counseling services. There is a constant contact established with full-fledged hospitals at the premises, and in case of emergency or necessity, those students are referred and sent to the respective hospitals for further analyses and treatments.

Psychological Counseling and Guidance Center (PDRM)

Primarily focusing on the needs of the students, we, at Kadir Has Psychological Counseling and Guidance Center, aim to offer multi-culture psychological services with a reliable, sheltered environment on a voluntary basis as well as mental health services for protective/preventive and even interfering purposes in order to ensure that the students are able to be aware of their mental, emotional and social potentials, and make use of these potentials and the resources available to them. Kadir Has University provides its students, lecturers and administrative personnel with short-term and solution oriented psychological counseling services.

We also take preventive actions in order to support the development of individuals as a whole, minimize risks that would otherwise adversely affect their development and, increase the protective factors to that end.

With the “Life Skills Training Programs”, we design various programs for the students such as;

- Harmonization with Changes
- Time Management and Motivation Workshop
- How Do We Learn? Workshop for Learning Skills
- Workshop to Increase Wellbeing
- Addiction Workshop
- Robust from what? Resilient to what? Psychological Resilience Workshop
- Emotional Awareness
- Three Siblings: Perfectionism, Anxiety and Procrastination Workshop
- Self-compassion Workshop
- Workshop on How to Overcome the Stress

With the “Student Monitoring and Guidance Activities”, we aim to

- Monitor the significant declines in the academic success of the students starting from the very beginning of their education at the faculty, and contact the students to prepare a guidance or response plan with the involvement of the students, addressing their needs and requirements.
- Keep in touch with the students with a risk of failing to graduate as a preventive action and, to prepare a guidance or response plan with the involvement of the students, addressing their needs and requirements.
- Provide the right information and guidance so that the students could access and make use of the services available at the university whenever there is a need.

You may use myKHAS to make an appointment for online/face-to-face talks at Kadir Has Psychological Counseling and Guidance Center.

Campus Life is Better with Student Clubs

We attach great importance to completing your personal development, using your spare time, and increasing your knowledge, skills, and creativity. For this purpose, we support a modern understanding of education and social, cultural, sports, and artistic events and organizations.

Among these events and organizations at our university are the panels, conferences, and forums with scientists, politicians, business people, and specialists; interviews, concerts, theater plays, and autograph sessions with favorite players and performers; and sports organizations, festivals, travels, exhibitions and organizations that the students participate in.

Not only the number but also the success of these Student Clubs increase every year, providing the students with opportunities to take responsibility and improve themselves in the areas of their interest to differentiate for the times after graduation.

Join the University Administration

Consisting of the representatives of the students who are elected among and by them as a result of a democratic process, the Student Council establishes an efficient communication between the university executive bodies and the students, who could then engage in the decisions made and, be represented in the administration.

The Student Council

- Participates in the sections of the executive board meeting concerning the students through the faculty representatives and the Chairman of the Council, speaking out problems with respect to the students, presenting opinions and, offering solutions.
- Produces solutions and projects making efforts based on scientific, creative, innovative and research-oriented approach intended to solve student problems and, improves the issues concerning the students.
- Promotes the facilities made available at the university so that the students may make the best thereof, conducts surveys and drafts reports to understand the opinions of the students concerning thereto.
- All the students are enrolled with the faculties, graduate schools and departments at our university are the natural members and, eligible to participate in all types of activities.

Student Clubs Association

- Consists of a representative from each student club so that the students could attend and participate in scientific, social, cultural and sports events and organizations during extracurricular times.
- Is managed by a Executive Board consisting of 5 students elected by and among the club representatives, which has the right to speak about the identification of the needs of the student clubs, the audit of the management thereof, and the allocation of the budgets among the clubs.
- The Executive Committee is formed with the participation of the General Secretary of the University, the Director of Campus Life and an academician to the Executive Board.
- This Executive Committee listens to, assesses and make a final decision on the suggestions and recommendations of the Executive Board about the student clubs.

Sports Facilities

Kadir Has University is active in a wide range of sports. Sports facilities carried out at the University aim to improve the physical abilities of students other than academic and cultural activities as well as to contribute to the development of their physical health.

Our campus has a fitness saloon, indoor gym and climbing wall for the use of students, academic and administrative staff.

Sports facilities at our university are carried out in three different fields via expert coaches with national team experience: University team training, individual and group work, in-university and inter-university organizations.

Kadir Has University attaches great importance to the development of students in sports facilities as well as their education.

Sports Scholarship

This is a type of scholarship that is granted to the students, who have been admitted to the university sports teams, participated or qualified to participate in competitions representing Kadir Has University. The main purpose of this sports scholarship is that these students represent Kadir Has University in their own sports branches attaching priority to their education success.

Sports Teams Performing at the University:

- Badminton (Men-Women)
- Basketball (Men-Women)
- Basketball 3x3 (Men-Women)
- Fencing (Men-Women)
- Football (Men-Women)
- Futsal (Men)
- Folk Dances (Men-Women)

School of Foreign Languages and English Preparatory Program

Department of Foreign Languages (DFL)

The School of Foreign Languages (SoFL) was established to ensure coordination of the educational activities intended to make sure that a graduate from Kadir Has University is proficient in at least one foreign language as expected from them.

The units affiliated with this school is the English Preparatory Program, the Modern Languages Program and the iLearning Center. The common purpose of these units is to ensure that a student, who is enrolled with an undergraduate program at Kadir Has University, where all or part of the education is taught in English, has the high level of communication skills in English, which they may need at the academic and business world, and has the language skills in a foreign language of their choice at a level that they communicate in daily life. The SoFL is responsible for designing, planning and implementing the activities of these units in a manner that each activity supports one another in harmony with the general education understanding of the university making use of a holistic approach.

English Preparatory Program (EPP)

Each student, who is enrolled with a department or program at our university, where all or part of the education is taught in English, but who does not fulfill the exemption requirements, will take an English Placement and Proficiency Exam (KHAS-STYS).

The first step of this two-step exam is a test, which determines the student's current level of English language and, is a threshold regarding the second step. The students who have failed to pass the required threshold according to the first step exam results are automatically enrolled with the EPP Track 1 and Track 2. Those who are determined at the first step to be intermediate level or above are required to take the English Proficiency Exam, which is the second step. The students, whose total score at this step is 60 or above, will start their education for the first year at the respective departments.

Some of the international language exams are considered sufficient in order to be exempted from the English Preparatory Program. The minimum scores required in these exams are as follows:

TOEFL-IBT	CAE	CPE	PTE-Academic
78	C	C	67
Valid for 2 years	Valid for 3 years	Valid for 3 years	Valid for 2 years

Modern Languages Program (MLP)

Today, communication in a second foreign language other than English is a positive qualification and essential in terms of contribution to your academic and professional life as well as intercultural interaction. As an academic institution that is aware thereof, the MLP provides you the opportunity to learn a sufficient level of second foreign language such as Armenian, Russian, Arabic, Italian, German, French and Spanish, which will enable you to communicate throughout daily life. You can take one of these elective courses during your university education.

LIFE LONG EDUCATION ACADEMY

As Kadir Has University Life Long Education Academy (YBEA), we have been preparing programs beneficial for the career and personal development of newcomers to business life and individuals from all age groups at different career points for over a decade. As an academy aiming to train qualified human resources in changing world conditions, we seek to provide sectors with a skilled labor force through training programs we develop in line with social needs.

Creating education programs in cooperation with the experienced academicians of Kadir Has University and, the most important representatives of the education world, it offers modern and up-to-date solutions for personal and corporate needs for education.

We are committed to shedding light on the personal and professional developments of people by means of maintaining these unique characteristics of our university, a dream of Kadir Has, an entrepreneurial spirit, and charitable person devoting himself to education.

All the students are free to enjoy a discount of 50%.

You can visit our website to get detailed information about our training programs and to register: <https://ybea.khas.edu.tr/>.

Industrial Relations and Technology Transfer Office

Established in 2014 with the support of TUBITAK, the Industrial Relations and Technology Transfer Office continues to operate under the organization of the R&D Resources Directorate at Kadir Has University.

Technology Transfer Offices are such structures that have been active in the world and Turkey since the early 2000s with the basic functions of the Collaboration between Universities and Industries, Intellectual Property Rights - Patents and Commercialization, Entrepreneurship and Promotion. Basically, these offices are intended to build synergistic cooperation between the academy, industry and public and, maximize the output from Research and Development.

The primary objective of the Industrial Relations and Technology Transfer Office following the mission of our founder Kadir Has to contribute to the economic and social development of our country in line with his philosophy of “Paying back for National Service” is to serve as a bridge to strengthen cooperation between university, industry and public, enable the ecosystem of the university consisting of students, academicians and graduates to understand and solve their own needs as well as the needs of industries through innovative ways by making use of technology and science, and further improve the added value created by the entrepreneurship in their own business and industry.

The Industrial Relations and Technology Transfer Office's understanding of entrepreneurship and innovation is based on bringing together the following 5 main disciplines:

- most advanced technology,
- most creative design,
- most profitable business,
- most efficient communication,
- most rigorous legal framework.

Activities of the Industrial Relations and Technology Transfer Office

- Fundamentals of entrepreneurship and innovation
- Entrepreneurship and innovation in business and trade
- Entrepreneurship, innovation and technology
- Creativity and design in innovative entrepreneurship
- Entrepreneurship and communication
- Entrepreneurship and innovation in terms of law
- Digital entrepreneurship
- Entrepreneurship activities
- In-house entrepreneurship

Industrial Collaborations and Financial Supports

Acting as a bridge between the university and the respective industries; offering supports to increase the number of and facilitate the R&D projects to be carried out jointly, and giving information about national and international funds and, supports during the application stage.

Securing Ideas and Inventions

Carry out necessary research and applications in order to secure new ideas and inventions under patent and protect intellectual property rights. Support licensing and commercialization of secured intellectual property rights.

Kadir Has University Silivri Technopark

Technoparks in Turkey are considered one of the significant building blocks of the ecosystem of R&D and entrepreneurship. There are currently 96 technoparks, where more than 14 thousand projects of R&D, software and design by 101,325 personnel in 9,507 companies. The total sales of these companies exceed TL 290 billion, while their total export figures are now more than TL 9.8 billion.

It was recently announced that **Kadir Has University Silivri Technology Development Zone (KHAS Technopark)** would enter into service on a beachside area of 100 decares owned by the Municipality of Silivri and allocated to Kadir Has University for 49 years. In December 2022, a presidential decree declared this area a Technology Development Zone (Technopark). In April 2023, Kadir Has University Silivri Technopark (KHAS Technopark) was established to operate this area.

KHAS Technopark aims to contribute to the economy of the region and the country through R&D efforts to be carried out in cooperation between universities, public institutions, industrial companies, and non-governmental organizations. It aims to create an ecosystem where R&D-based advanced technology products and services are to be developed, establish innovative companies with the knowledge and skills of academics and university students, especially our university's academics and students, and emphasize mechanisms to support women entrepreneurs.

Accordingly, **the focal points prioritized by KHAS Technopark for project applications** are the areas of expertise of the faculty members of Kadir Has University, the vision of the Municipality of Silivri, and the regional needs and requirements classified under 10 headings: **Agriculture and Green Transformation, Disaster Management, Energy, Robotics, Communication, Artificial Intelligence, Cyber Security, Health, Advanced Materials and Finance.** As all of these focal points relate to sustainability, the motto of KHAS Technopark will be **“Sustainable Innovation Ecosystem”**.

KHAS Technopark, where there are **pre-incubation and incubation centers, joint working areas, special office areas and sports areas**, is scheduled to operate as of October 2023.

Applications to KHAS Technopark may be submitted at: www.khasteknopark.com.tr. We welcome applications from students with business ideas.

Career Office

The main objective of Kadir Has University Career Office is to carry out next generation career planning activities intended to enhance the chance of being employed for our students and help them make the best of their potentials. The concept of employability covers wide a range of sub-headings in it such as professional knowledge, business experience, business skills, career vision, life skills and self-management. The career office organizes a series of training sessions and events suitable for the respective educational levels and departments in an experiential manner contributing to their personal development and career planning.

This new generation career approaches suggest that an individual needs to develop and improve not only their professional skills but also life skills, which cover a wide range of aspects from the challenge against difficulties encountered in life to the management of victories gained, and thus considering it, we diversify the extent of career management with a philosophy encompassing business and life as a whole.

We guide our students through consultancy support, which is to help them make career plans, training organizations, through which they are entitled to necessary certifications, information on career fairs and education abroad, company visits and technical travels to give them an opportunity to know about their sectors, internship and business connections, cv reviews, and interview simulations etc.

On What Subjects Can You Get Support from the Career Office?

Career Support The Career Office supports the internship processes of our students so that they could be familiar with the business world, and get sufficient experience in the industries and business lines, in which they wish to get employed, while they continue their education. Accordingly, we establish cooperation and develop business partnership with companies and corporations operating in different industries. The students submit applications to such companies and corporations through our website, where all the internship processes are carried out.

Business Support Job adverts for full time positions by the companies and corporations, with which we act in cooperation, are announced to our students and graduates, who may also submit direct applications to the partner companies through the website.

Study Abroad For the students, who wish to have their postgraduate education abroad, we support them with the preparation of letters of intent and letters of motivation, as well as CV's for their applications for study abroad, and inform them about certain significant criteria helping them get admitted on scholarship, and we also provide them with one-to-one consultancy services offering them a chance to meet the specialists in this area.

Industrial Supports The Career Office operate as a solution partner in cooperation with such companies and corporations, with which we are in contact in the business world, aiming to provide our students with direct or indirect benefits for their efforts in this respect. For the purpose of contributing to the processes of these companies and corporations in respect of the recruitment and placement of full time and half time employees, we also help those students, who look for a job or internship, screening their CV's and guiding them accordingly.

These efforts of CV scanning and guidance we perform for our students also include the review of the CV's submitted for the respective job adverts based on concrete criteria established by these companies and corporations (faculties, departments, ages, gender, experience etc.) and referring those suitable candidates to the respective companies and corporations.

Through such organizations held at our university in the form of training, seminars, company introduction and career days, we ensure that the students and graduates meet these companies and corporations, and they could know about them and, directly apply to such vacant positions.

Upon the request of those companies and corporations, with which we act in cooperation for internship and employment, we at the Career Office host them and our student at our campus facilitating their interview organizations.

Career Development Training

We at Career Office organizes seminars directly or through business professionals as intended to help our students know about themselves, choose their professions based on their talents and skills considering the new generation career planning approaches, gain the skills for efficient job search methods and employability, and, become such individuals who have the strong capabilities for competition closely following industrial and technological developments after they enter the business world.

Career Days, Career Fairs

During the career days and similar events that we generally organize in spring semesters, we host such companies and corporations operating in different industries from technology to manufacturing, foodstuff to banking, financing to defense at our university so that the students have a chance of knowing about and ask questions to them. And during a career fair, the students are able to submit their CVs to the participating companies and corporations, and get detailed information about their criteria for recruitment and internship opportunities.

Company Visits and Corporate Travels

These company visits we organize are intended to provide our students with a chance of being familiar with the corporate climate, business manners and department diversities in companies and corporation operating in various industries, and spend some valuable time with the business professionals at work. Our students, who participate in corporate travels organized by the Corporate Office, get the opportunity to closely monitor the business world, and are enabled to establish internship and employment connections creating a social network.

Structured Career Consultancy

This career consultancy program we organize at the Career Office is of a program carried out in the form of one-to-one and in-person or online interviews of 45 minutes each, where our students are able to assess their current position considering the information obtained from the new generation career planning approaches; review their decisions about their choice of profession and employment; be aware of the transformation of the way they work in the age of artificial intelligence and meta universe; listen to the options for investments they could make for their own career development; and receive recommendations about the preparation of their CVs and some tips to enhance their interview performances.

Please consider sending an e-mail to kariyer@khas.edu.tr in order to get an appointment for career consultancy services.

Follow the Career Office on Social Media!

Please visit <https://kariyer.khas.edu.tr/> on a regular basis to view the current internship and job adverts, and have a chance of participating in our events of various subjects from seminars to get information about study abroad for master's degrees/doctorate degrees to the meetings to gather together with the professionals from the business world. We also recommend you follow our Instagram account **@khascareer** so that you could get the news from the Career Office.

Creative Industries Platform (YEP)

The Creative Industries Platform supports the innovative and creative ideas of all the students of Kadir Has University irrespective of their departments and semesters. With its experiences and dynamic staff, the CIP helps the students develop innovative-creative production, design and art ideas, provide them mentorship to find internal or external sources needed, and give them the materials and equipment required to perform the projects. During this process, it works in person with those who make applications to create the most accurate roadmap for each project, and stand by the students at each stage from the very beginning of the project.

Within the organization of the CIP, there is a project support program (InIDEA) and hubs, in which the respective projects are carried out (FilmHUB, GameHUB, TechnoHUB, TheaterHUB).

Project Support Program

InIDEA With the program intended to support the student projects based on innovative-creative ideas, which is called InIDEA, we support our students so that they could prepare projects for their innovative and creative ideas in respect of arts, entrepreneurship, design, technology and other areas, and then put them into practice.

Joint Working Ecosystems for Students in Certain Areas

FilmHUB is a joint working ecosystem supporting the ideas that our students, who are enthusiastic in the fields of films and cinemas that are considered one of the most important tools to express ideas, want to put into practice. With the supports from the faculty members and business professionals, the projects of our students based on innovative and creative ideas are put into practice in this hub.

Game-HUB organizes game development with Unity training sessions for the students, who are interested and want to improve themselves in the field of digital games. Training sessions start with the basic level for the students with no knowledge in this field. With these training sessions, the students at KHAS set out on a journey in the digital game world, which is not only informational but also joyous.

TeknoHUB is designed as a structure, where students who are interested in technology in general and autonomous vehicles in particular, meet one another and develop projects. Supported by the technical equipment of TechnoHUB, the students participate in national and international competitions with the vehicles they design.

TheaterHUB is available for applications by those students, who are interested in theater and performing arts at any semester of the year. TheaterHUB is intended to support the students in genuine projects based on their innovative and creative ideas they may wish to put into practice in the field of theater and performing arts.

PlasticLAB Our students are free to put into practice their sustainability efforts at PlasticLAB, where they will find sufficient equipment to use waste plastics in a useful manner.

Programs Intended to Support Projects for Improving the Spirit of Entrepreneurship of the Students

Through the **Start-UP CUP Program** common workshops are organized with a start-up business so that our students could experience the start-up culture, one of the most important and innovative business models in today's world. These workshops allow our students to get familiar with the entrepreneurship culture, and experience what it is to work for a start-up. At the end of this program, our students will have a chance to work as a full-time intern at a start-up.

LookHAS Program supports the students so that they could get acquainted with the new generation media, improve their basic production skills and, produce contents suitable for these media. As the first output of this program, introduction films have been shot, in which our students talked about their departments from their own points of view based on the idea that "who could be better to talk about Kadir Has than the students at Kadir Has", and broadcast at communication media.

FabriKHAS: Turkey's First Creativity Center for Display Industry

FabriKHAS that is to be established under the roof of Kadir Has University Creative Industries Platform (KHAS-CIP) is intended to produce solutions for problems and requirements of the display industries, and enhance the power of competition for the creative industries at regional and global scales. This platform is the first and only creative center in Turkey focusing on the display industry.

There will be technical equipment to meet the requirements of a film-making process at any stage thereof in the building to be allocated to the platform at the Golden Horn Campus of the University.

In addition, the film set located within the organization of the university will meet the demands of the sector.

Supported by the European Union and the Republic of Turkey Ministry of Industry and Technology with an amount of Euro 5 million and constructed by Kadir Has University, FabriKHAS is part of the IPA II Competitiveness and Innovation Sector Operational Program.

Alumni Relations Office

The Alumni Relations Office intends to ensure that our graduates live by the core values of Kadir Has University and have the spirit of being a member of KHAS. This office makes efforts to strengthen the ties of our graduates with one another, with existing students and with the university, keep their feelings of belonging alive, increase solidarity and improve communication.

It keeps our graduates updated with the current developments at the university by means of informing them on news about events and organizations. In order to ensure that our graduates are accurately informed, it updates the relevant information and data on a regular basis, and keeps the data about our graduates updated.

It attaches great importance to the opinions and suggestions from our graduates and, operates on a satisfaction-oriented basis. Accordingly, it conducts surveys with the graduates in order to measure and evaluate their level of satisfaction and employment rates, and informs the senior management accordingly so that an assessment could be made for the necessary improvements.

To strengthen the university-industry network, the Alumni Relations Office acts as a bridge to bring together the companies where our successful graduates work and our academic staff for project mentoring. It ensures that internship and job opportunities in the companies where our graduates work are shared with our other graduates and students.

The Alumni Relations Office is where our graduates can drop by any time and receive information about their professional lives. It serves as a unit where they can get support by consulting on any subject.

Activities for the Graduates

In addition to our Alumni Meetings, where our graduates come together every year, the Alumni Relations Office host on a regular basis Rector-Graduates Meetings, Dean-Graduates Meetings, seminars, interviews and different organizations.

With the support of our graduates, it also organizes various activities in cooperation with HASMED Alumni Association in order to contribute to the development of our university and our students.

Rezan Has Museum

The Rezan Has Museum is a museum space that came to life with the remains of an Ottoman building and a Byzantine cistern on the ground floor of our university's historic building, which was awarded the **2003 Europa Nostra Award**. Opened in 2007, the Rezan Has Museum has a collection of archaeological artifacts covering a comprehensive period **from the Neolithic to the Seljuk Period**. In addition, historical documents and objects from the **Cibali Tobacco Factory**, which was converted into the university's main building, are also included in the museum.

The archeological artifacts are exhibited on the **museum floor**, where the building remains from the Ottoman Area and the Byzantine cistern are located, and unique and thematic exhibitions are organized on the exhibition hall floor consisting another section of the museum.

The building remains from the late Ottoman era that welcomes the visitors on the museum floor are from the 17th century. The Seferikos Cistern built in the Byzantine Period for the water need of the city is dated on 11th century.

Our museum is open to visit from **09.00 to 18.00 every day through the week**.

Info and Contact

Kadir Has University is one of the most significant research universities in Turkey and offers students an education model unique in Turkey and an example for the world. Under the KHAS Education Model's scope, where a special assessment and evaluation system is applied instead of a conventional examination system, we train qualified professionals, researchers, and scientists for both the business and academic worlds and graduates capable of working anywhere.

As the first step of the KHAS Education Model, the Core Program (Department of Core Academics) has been designed to gather together all the students of different backgrounds admitted to the other departments of our University with a common academic curriculum in the first year of their education. During the courses focusing on various problems and research areas in the fields of humanities, natural sciences, arts, and social sciences, we intend to make sure that our students develop interests in different issues towards society, the world, and humanity as a whole through individual and shared projects, leaving behind the traditional methods of teaching and evaluation. As the second step, Project Based Education allows the students to learn by experiencing instead of a rote-learning-based education system. Our academicians encourage students to participate in research projects starting the first year. With the opportunities given through double major and minor education programs, the students have a chance to specialize in multiple areas at the same time.

It is easy to arrive at our campus on the Golden Horn from anywhere in Istanbul. The building Tekel Cibali Facility, used as the tobacco warehouse and cigarette factory, has been faithfully restored and turned into a campus of our University. This campus is located in a historically significant area of Istanbul and is an exciting location with marks reminding one of the past; it was awarded the Europa Nostra Award. The chancellor's office, faculties, schools, and research centers are there. This campus, with an indoor usage area of up to 50 thousand square meters, accommodates classrooms, laboratories, an information center (library), a theater, conference halls, movie theaters, sports facilities, a restaurant, cafeterias, and a dance studio.
