

# Faculty of Engineering an Naturel Science

## 2025-2026 Fall Final Schedule

| Date                 | Time          | Course Code       | Course Name                                          | Place                                  |
|----------------------|---------------|-------------------|------------------------------------------------------|----------------------------------------|
| 29.12.2025<br>Monday | 10:00 - 12:00 | INE205/MTE211     | Computer-Aided Technical Drawing/Technical Drawing   | Online-D112                            |
|                      | 10:00 - 12:00 | CMPE351           | Computer Networks                                    | B409-B410                              |
|                      | 12:00 - 14:00 | CMPE475           | Machine Learning                                     | PC LAB-2                               |
|                      | 14:00 - 16:00 | CMPE201           | Discrete Computational Structures                    | Cibali Hall                            |
|                      | 16:00 - 18:00 | CIV321            | Site Management                                      | B223                                   |
|                      | 09:00 - 18:00 | CMPE403           | Data Science and Analytics Project                   | D119                                   |
|                      | 14:00 - 16:00 | MBG433            | Cancer Biology                                       | B303                                   |
|                      | 14:00 - 16:00 | EEE203            | Circuit Analysis I                                   | D103                                   |
|                      | 14:00 - 16:00 | MBG201            | Bioorganic Chemistry I                               | B312                                   |
|                      | 14:00 - 16:00 | INE319            | Supply Chain Management                              | Fener Hall-Galata Hall                 |
| 30.12.2025 Tuesday   | 10:00 - 12:00 | INE205/MTE211     | Computer-Aided Technical Drawing/Technical Drawing   | Online-D112                            |
|                      | 10:00 - 12:00 | FENS200           | Probability and Statistics                           | D Great Hall-Fener Salonu              |
|                      | 14:00 - 16:00 | MTE422            | Fuzzy Logic Control                                  | D119                                   |
|                      | 16:00 - 18:00 | CMPE341           | Operating Systems                                    | B211-B212                              |
|                      | 12:00 - 13:00 | INE214.01         | Programming Tools for Industrial Engineering         | MyLab                                  |
|                      | 13:00 - 14:00 | INE214.02         | Programming Tools for Industrial Engineering         | MyLab                                  |
|                      | 14:00 - 16:00 | CHEM121           | General Chemistry Lab I                              | B409                                   |
|                      | 09:00 - 18:00 | INE102            | Principles of Industrial Engineering                 | D103                                   |
|                      | 09:00 - 18:00 | CMPE412           | Computer Simulation                                  | D112                                   |
|                      | 14:00 - 16:00 | FENS105           | Linear Algebra                                       | D Great Hall - Cibali Hall             |
|                      | 10:00 - 12:00 | MBG309            | Introduction to Programming via Python               | PC LAB1 - PC LAB2                      |
| 2.01.2026 Friday     | 10:00 - 12:00 | CMPE353           | Analysis of Algorithms                               | Cibali Hall - Galata Hall              |
|                      | 16:00 - 18:30 | FENS111           | Physics I                                            | Cibali Hall - Fener Hall - Galata Hall |
|                      | 16:00 - 18:00 | INE321            | Facility Design and Plant Layout                     | B410                                   |
|                      | 09:00 - 18:00 | CIV263 / MTE201   | Dynamics of Physical Systems / Engineering Mechanics | D103                                   |
|                      | 11:00 - 18:00 | MTE412            | Computer Aided Manufacturing Project                 | PC Lab 2                               |
|                      | 14:00 - 16:00 | CIV341            | Hydraulics                                           | CIV-LAB                                |
|                      | 09:00 - 18:00 | CMPE487           | Internet Programming Project                         | D119                                   |
| 5.01.2026 Monday     | 10:00 - 12:30 | FENS204           | Engineering Mathematics III                          | Cibali Hall - Fener Hall - Galata Hall |
|                      | 09:00 - 17:30 | MBG411            | Graduate Project I                                   | D114                                   |
|                      | 09:00 - 17:30 | FENS401.02        | Engineering Design Project I                         | D103                                   |
|                      | 09:00 - 17:30 | FENS401.03        | Engineering Design Project I                         | D119                                   |
|                      | 14:00 - 18:00 | EEE434            | Elektrik Güç ve Enerji Sistemlerinin Temelleri       | D113                                   |
|                      | 14:00 - 16:00 | INE313            | Statistical Decision Making                          | Cibali Hall - Galata Hall              |
| 6.01.2026 Tuesday    | 09:00 - 17:30 | FENS401.01        | Engineering Design Project I                         | D113-D114                              |
|                      | 09:00 - 17:30 | FENS401.02        | Engineering Design Project I                         | D103                                   |
|                      | 09:00 - 17:30 | FENS401.03        | Engineering Design Project I                         | D119                                   |
|                      | 09:00 - 17:30 | FENS401.04        | Engineering Design Project I                         | D118                                   |
|                      | 13:00 - 16:00 | MBG305/307        | Biochemistry I                                       | B312                                   |
|                      | 09:00 - 18:00 | MTE403            | Mechatronics System Design Project                   | D112                                   |
|                      | 10:00 - 13:00 | MBG103            | Biology I                                            | B312                                   |
|                      | 09:00 - 18:00 | CMPE140.S03       | Computer Programming I                               | PC LAB 2-D107                          |
| 7.01.2026 Wednesday  | 10:00 - 11:00 | CIV261            | Strength of Materials                                | H203                                   |
|                      | 13:00 - 16:00 | CIV471            | Settlement Issue                                     | H203                                   |
|                      | 09:00 - 18:00 | CMPE243.01        | Logic Circuit Design                                 | FabLab                                 |
|                      | 09:00 - 18:00 | EEE305/MTE392     | Microcontrollers/Embedded Systems Design Project     | D119                                   |
|                      | 09:00 - 18:00 | CMPE343           | Object Oriented Programming Languages                | D104                                   |
|                      | 13:00 - 16:00 | MBG205            | Genetics                                             | Cibali Hall                            |
|                      | 13:00 - 16:00 | MBG321            | Molecular Biology and Genetics I                     | Cibali Hall                            |
|                      | 13:00 - 16:00 | MBG207            | Genetik Lab.                                         | Cibali Hall                            |
|                      | 09:00 - 18:00 | CMPE241.01/MTE391 | Computer Programming II/Software Design Project      | D103                                   |
|                      | 09:00 - 18:00 | CMPE402           | Heuristic Optimization                               | D103                                   |
|                      | 09:00 - 18:00 | CMPE263           | Fundamentals of Electronic Circuits                  | LAB B                                  |

|                    |               |                       |                                                  |                                              |
|--------------------|---------------|-----------------------|--------------------------------------------------|----------------------------------------------|
|                    | 12:00 - 14:00 | CHEM101               | General Chemistry I                              | Fener Hall                                   |
|                    |               |                       |                                                  |                                              |
| 8.01.2026 Thursday | 10:00 - 14:00 | CIV371                | Investigation of Properties of Soil              | H203                                         |
|                    | 10:00 - 13:00 | MTE491                | Robot Design Project                             | D112                                         |
|                    | 09:00 - 18:00 | CMPE243.02            | Logic Circuit Design                             | FabLab                                       |
|                    | 09:00 - 18:00 | CMPE140.01/CMPE140.02 | Computer Programming I                           | D113                                         |
|                    | 09:00 - 18:00 | CMPE343               | Object Oriented Programming Languages            | D104                                         |
|                    | 14:00 - 16:30 | INE311                | Operations Research I                            | Cibali Hall                                  |
|                    | 09:00 - 18:00 | CMPE241.01/MTE391     | Computer Programming II/Software Design Project  | D103                                         |
|                    | 09:00 - 18:00 | CMPE402               | Heuristic Optimization                           | D103                                         |
|                    | 09:00 - 18:00 | EEE303                | Electronics I                                    | LAB B                                        |
|                    | 16:00 - 18:00 | MBG425                | Organic Chemistry of Drug Design and Drug Action | B311                                         |
